**Instructions for collection:**

- **Samples are accepted Monday – Thursday, 8:00 AM – 4:30 PM.**
- Do not open bottle until you are ready to collect a sample.
- Do not touch the inside of the bottle or cap; they are sterile.
- Sterilize the end of the faucet with rubbing alcohol (min. 70%).
- Wait until tap is dry before running the water. An unsoftened, sprayer-free tap is recommended.
- Collect sample immediately for lead/copper analysis.
- Run cold water for at least 2 minutes before collecting for any other analysis.
- Fill the bottle to the fill line. Some air is necessary to keep bacteria alive.
- Keep sample cool. Place in the refrigerator or cooler.
- Do not freeze sample. Acceptable sample storage temperature: 2-6°C / 35.6-43.8 °F.
- Bring in the sample to Techtron within 12 hours of taking the sample and on ice.
- Results are reported in 1-2 days for nitrates and total coliform, or up to 1 week for lead or arsenic.

Analysis Requested: (circle)

Nitrates.....\$25\*

Total Coliform/E. coli.....\$30\*

Lead.....\$45

Arsenic.....\$40

Nitrites.....\$40

(Call for Other Options)

\* Nitrates and Total Coliform: \$50 for both tests if tested concurrently.

\*\* Each analyte requires separate samples.
